Course description

This course is an advanced graduate-level introduction to formal semantics. It is designed to prepare students for serious research in these areas. We deal with basic tools in Model-theoretic semantics, compositionality, and more specific core topics such as negation, quantification, mood and modality, noun phrases, indefinites, definiteness, tense, aspect, and events. We overview the current literature of these topics and further examine these issues from a cross-linguistic perspective. Before taking this course, you should have some previous knowledge of semantics (e.g., 4345, undergraduate semantics/pragmatics, or a course in mathematical or philosophical logic).

Student Learning Outcomes

The course will be formally and conceptually challenging, so diligent reading and *active* participation in discussion is expected. On successful completion of this course, students will understand the core tools and theoretical issues of semantics, and will be able to conduct an independent research on the semantic and pragmatic questions regarding the relevant topics, or interface issues with other subfield of linguistics.

Requirements:

The requirements for the course will include reading, presentations, a proposal and a final paper. Each of you will give a presentation of your research topic to the class during the last two weeks of the semester. **Late posting of research question will NOT be accepted. Postponement of presentation/final paper will NOT be given without documented medical or family emergency.** You must notify me before the class/deadline if either of these events occurs. Further, a formal hard copy request for makeup must be submitted along with supporting documents. The decision on the makeup will be made after review of such documents. Makeups will be under the conditions set by the instructor. **Requirement missed for any other reason will result in a score of ZERO.** Grading policy will be given on the first day of class.

- **Attendance (10%).**
Students are expected to come to class on time and must **behave in a professional manner** during class. **More than three unexcused absence** will automatically bump **your grade to one lower level.** Only formal support for the reasons of absence will be accepted.
- **Research questions and online/offline discussion (20%)**
Every week students are required to read the assigned readings and upload 1-2 questions on blackboard “discussion board”. The questions must be uploaded two days before class (by midnight on Sunday), which may be discussed in class and may continue to be discussed online afterwards. Participation in both online and offline discussion will positively affect the grade.
- **Presentations (30%):**
 - Students will present one of the articles in supplementary readings. (10%)
 - Students will present a proposal of their paper topic on week 8. (10%)
 - Students will present their own final project at the end of the semester. (10%)

- **Final project (40%):**

In the final paper, you can either apply some of the tools we've learned to a new set of data in any language you are familiar with, and/or discuss some theoretical tension in the set of analyses presented in class. The final paper (10-15 pages, double-spaced) must be entirely individual work. Late submission will NOT be accepted.

COURSE POLICIES

- 1) Students are responsible for **checking the course Blackboard** regularly for the update.
- 2) **Electronic devices:** Please turn off and keep off all pagers, electronic games, MP3 and CD players, and cell-phones. If you are using a lap-top, please use it only for course related matters—failure to do so will negatively affect your participation grade.
