Introduction to Chemical Principles – SCIE 3302-007 – Spring 2019

Instructor	Dr. Greg Hale 105 Life Science Building email: greghale@uta.edu phone: (817) 272-3807 Office Hours: https://www.calendly.com/greghale
Faculty Profile	https://www.uta.edu/profiles/gregory-hale
Description of Course Content	This physical science course includes atomic structure, chemical bonding, the periodic table, nomenclature, gas laws, chemical equations, and solutions.
Course Materials	Introduction to Chemical Principles, 11 th Ed, Stoker required (Inexpensive rental available from Amazon; earlier editions also acceptable) (Older editions available for use in the SECC, 106 Life Science)
Grading Policy	Online Homework25%Due dates listed below and on BlackboardExams (5)75%
Points and Grades	A ≥90.00% B ≥80.00% C ≥70.00% D ≥60.00%
Exam Topics and Dates	Exam 1:Chpts 1-4February 10Exam 2:Chpts 5-7March 3Exam 3:Chpts 8, 9March 20Exam 4:Chpts 10-13April 14Exam 5:Chpts 14-16May 5
Make-up Policy	No make-up exams will be given. Put these dates on your calendar now.
Chapter Problems	Working through problems is the BEST way to learn the material in this course. Work through as many end of chapter questions as you can.
Drop Policy	Students may drop or swap (adding and dropping a class concurrently) classes through self-service in MyMav from the beginning of the registration period through the late registration period. After the late registration period, students must see their academic advisor to drop a class or withdraw. Undeclared students must see an advisor in the University Advising Center. Drops can continue through a point two-thirds of the way through the term or session. It is the student's responsibility to officially withdraw if they do not plan to attend after registering. Students will not be automatically dropped for non-attendance . Repayment of certain types of financial aid administered through the University may be required as the result of dropping classes or withdrawing. For more information, contact the Office of Financial Aid and Scholarships (http://wweb.uta.edu/aao/fao/).
Disability Accommodations	UT Arlington is on record as being committed to both the spirit and letter of all federal equal opportunity legislation, including <i>The Americans with Disabilities Act (ADA), The Americans with Disabilities Amendments Act (ADAA),</i> and <i>Section 504 of the Rehabilitation Act.</i> All instructors at UT Arlington are required by law to provide "reasonable accommodations" to students with disabilities, so as not to discriminate on the basis of disability. Students are responsible for providing the instructor with official notification in the form of a letter certified by the <u>Office for Students with Disabilities (OSD).</u> Students

	experiencing a range of conditions (Physical, Learning, Chronic Health, Mental Health, and Sensory) that may cause diminished academic performance or other barriers to learning may seek services and/or accommodations by contacting: The Office for Students with Disabilities, (OSD) www.uta.edu/disability or calling 817-272-3364. Counseling and Psychological Services, (CAPS) www.uta.edu/caps/ or calling 817-272-3671.
	Only those students who have officially documented a need for an accommodation will have their request honored. Information regarding diagnostic criteria and policies for obtaining disability-based academic accommodations can be found at <u>www.uta.edu/disability</u> or by calling the Office for Students with Disabilities at (817) 272-3364.
Title IX	The University of Texas at Arlington does not discriminate on the basis of race, color, national origin, religion, age, gender, sexual orientation, disabilities, genetic information, and/or veteran status in its educational programs or activities it operates. For more information, visit <u>uta.edu/eos</u> . For information regarding Title IX, visit <u>www.uta.edu/titleIX</u>
Academic Integrity	Students enrolled in this course are expected to adhere to the UT Arlington Honor Code:
	I pledge, on my honor, to uphold UT Arlington's tradition of academic integrity, a tradition that values hard work and honest effort in the pursuit of academic excellence. I promise that I will submit only work that I personally create or contribute to group collaborations, and I will appropriately reference any work from other sources. I will follow the highest standards of integrity and uphold the spirit of the Honor Code.
	UT Arlington faculty members may employ the Honor Code as they see fit in their courses, including (but not limited to) having students acknowledge the honor code as part of an examination or requiring students to incorporate the honor code into any work submitted. Per UT System <i>Regents' Rule</i> 50101, §2.2, suspected violations of university's standards for academic integrity (including the Honor Code) will be referred to the Office of Student Conduct. Violators will be disciplined in accordance with University policy, which may result in the student's suspension or expulsion from the University.
Student Support Services	UT Arlington provides a variety of resources and programs designed to help students develop academic skills, deal with personal situations, and better understand concepts and information related to their courses. Resources include tutoring, major-based learning centers, developmental education, advising and mentoring, personal counseling, and federally funded programs. For individualized referrals, students may visit the reception desk at University College (Ransom Hall), call the Maverick Resource Hotline at 817-272-6107, send a message to resources@uta.edu, or view the information at http://www.uta.edu/universitycollege/resources/index.php

	The Chemistry Clinic is staffed with student tutors, and it is located in room 318 Science Hall. Tell the tutor that you are in a class like CHEM 1400.
Electronic Communication	UT Arlington has adopted MavMail as its official means to communicate with students about important deadlines and events, as well as to transact university-related business regarding financial aid, tuition, grades, graduation, etc. All students are assigned a MavMail account and are responsible for checking the inbox regularly. There is no additional charge to students for using this account, which remains active even after graduation. Information about activating and using MavMail is available at http://www.uta.edu/oit/cs/email/mavmail.php .
Student Learning Outcomes	 Define and understand terms used by chemists Identify the steps in the scientific method. Predict the number of significant figures contained in a number Delineate between the significant figure rules for addition, subtraction, multiplication, and division Demonstrate how to solve dimensional analysis problems using a scientific calculator Demonstrate how to solve metric conversion problems using a scientific calculator Demonstrate how to solve density problems using a scientific calculator Demonstrate how to solve density problems using a scientific calculator Discriminate between physical and chemical change and physical and chemical properties Identify pure substances Identify symbols and names for the assigned elements Identify extensive and intensive properties Define and articulate the difference between the terms "heterogeneous" and "homogeneous." Discriminate between atomic mass and atomic number; Analyze the periodic table and tell the number of protons, neutrons, and electrons in atoms; Identify the number of protons, neutrons, and electrons in ions; Explain how the atomic number was derived for the periodic table using the weighted average concept Identify isotopes Create electron configurations of elements using the periodic table Write orbital diagrams from electron configurations Recall where halogens, representative elements, alkali metals, alkaline earth metals, and transition elements are located on the periodic table Explain how to tell the number and kind of elements contained in a compound Use the periodic table to determine the ending sub-level in an electron configuration Know the trends for atomic radius and metallic character Create Lewis structures Determ

- 30. Write formulas from the names of a compound
- 31. Determine if a compound contains ionic or covalent bonds
- 32. Name compounds from chemical formulas, and
- 33. Write chemical formulas from names
- 34. Determine the formula mass of compounds
- 35. Work all types of mole calculations
- 36. Determine the empirical formula for a compound
- 37. Identify the difference in empirical and molecular formula
- 38. Determine the percent composition of a compound
- 39. Demonstrate the ability to balance equations using symbols and words
- 40. Predict the products of a chemical reaction
- 41. Identify the type of reaction
- 42. Solve stoichiometric problems
- 43. Predict the type of intermolecular forces present in a sample of a compound
- 44. Rank compounds by boiling point
- 45. Modify the ideal gas law equation and use to solve all gas law problems
- 46. Determine the percent composition of a compound
- 47. Explain the Kinetic Molecular Theory
- 48. Calculate concentrations using various units
- 49. Determine how to dilute solutions to a given molarity
- 50. Identify which compounds are acids and which are bases
- 51. Identify conjugate acids and bases
- 52. Articulate the definitions of acids and bases
- 53. Explain the difference in a strong and weak acid and base
- 54. Explain the pH scale
- 55. Assign oxidation numbers to elements
- 56. Identify what is oxidized and reduced
- 57. Identify oxidizing and reducing agents
- 58. Define an endothermic reaction
- 59. Define an exothermic reaction
- 60. Identify modifications to a reaction that will cause it to produce more or fewer products
- 61. Identify modifications to a reaction that will cause it to speed up or slow down
- Student FeedbackAt the end of each term, students enrolled in classes categorized as
"lecture," "seminar," or "laboratory" shall be directed to complete an online
Student Feedback Survey (SFS). Instructions on how to access the SFS for
this course will be sent directly to each student through MavMail
approximately 10 days before the end of the term. Each student's feedback
enters the SFS database anonymously and is aggregated with that of other
students enrolled in the course. UT Arlington's effort to solicit, gather, tabulate,
and publish student feedback is required by state law; students are strongly
urged to participate. For more information, visit http://www.uta.edu/sfs.
- **Copyright Statement** © Copyright 2019 Gregory R. Hale and Dick Powell as to this syllabus and all classes. Students are prohibited from selling (or being paid for taking) notes during this course to or by any person or commercial firm without the express written permission of the instructors teaching this course.

Course Schedule

Unit 1

- 1/19/2019 11:59 PM Chapter 1 Homework
- 1/26/2019 11:59 PM Chapter 2 Homework
- 2/1/2019 6:00 PM Q&A Session 226 Science Hall
- 2/2/2019 11:59 PM Chapter 3 Homework
- 2/9/2019 11:59 PM Chapter 4 Homework
- 2/10/2019 Exam 1 Exam begins at 8 am; 90 minute limit; must finish by 11:59 pm in one sitting; Can use handwritten notes, scratch paper, pens/pencils, periodic table, and calculator; Respondus browser with WebCam required: <u>http://www.respondus.com/lockdown/download.php?id=163943837</u>

Unit 2

- 2/16/2019 11:59 PM Chapter 5 Homework
- 2/23/2019 11:59 PM Chapter 6 Homework
- 3/1/2019 6:00 PM Q&A Session 226 Science Hall
- 3/2/2019 11:59 PM Chapter 7 Homework
- 3/3/2019 Exam 2 Exam begins at 8 am; 90 minute limit; must finish by 11:59 pm in one sitting; Can use handwritten notes, scratch paper, pens/pencils, periodic table, and calculator; Respondus browser with WebCam required: <u>http://www.respondus.com/lockdown/download.php?id=163943837</u>

Unit 3

- 3/9/2019 11:59 PM Chapter 8 Homework
- 3/18/2019 11:59 PM Chapter 9 Homework
- 3/18/2019 5:00 PM Q&A Session location posted on Blackboard
- 3/20/2019 Exam 3 Exam begins at 8 am; 90 minute limit; must finish by 11:59 pm in one sitting; Can use handwritten notes, scratch paper, pens/pencils, periodic table, and calculator; Respondus browser with WebCam required: <u>http://www.respondus.com/lockdown/download.php?id=163943837</u>

Unit 4

- 3/24/2019 11:59 PM Chapter 10 Homework
- 3/30/2019 11:59 PM Chapter 11 Homework
- 4/6/2019 11:59 PM Chapter 12 Homework
- 4/12/2019 6:00 PM Q&A Session 226 Science Hall
- 4/13/2019 11:59 PM Chapter 13 Homework
- 4/14/2019 Exam 4 Exam begins at 8 am; 90 minute limit; must finish by 11:59 pm in one sitting; Can use handwritten notes, scratch paper, pens/pencils, periodic table, and calculator; Respondus browser with WebCam required: <u>http://www.respondus.com/lockdown/download.php?id=163943837</u>

Unit 5

- 4/20/2019 11:59 PM Chapter 14 Homework
- 4/27/2019 11:59 PM Chapter 15 Homework
- 5/3/2019 11:59 PM Chapter 16 Homework
- 5/3/2019 6:00 PM Q&A Session 226 Science Hall
- 5/5/2019 Exam 5 Exam begins at 8 am; 90 minute limit; must finish by 11:59 pm in one sitting; Can use handwritten notes, scratch paper, pens/pencils, periodic table, and calculator; Respondus browser with WebCam required: <u>http://www.respondus.com/lockdown/download.php?id=163943837</u>
