CSE 4322: Software Project Management

Fall 2013

1 Instructor

- Christoph Csallner
- Office Number: ERB 554 (in the Engineering Research Building)
- Office Telephone Number: 817-272-3334
- Email Address: csallner@uta.edu
- Faculty Profile: https://www.uta.edu/mentis/public/#profile/profile/view/id/2395/
- Faculty Web Site: http://ranger.uta.edu/~csallner/
- Office Hours: Monday and Wednesday, 2:45 pm - 3:45 pm

2 Section Information

- CSE 4322, Section 001
- Class Web Site: http://ranger.uta.edu/~csallner/cse-4322/13-fall/index.html

3 Time and Place of Class Meetings

- Time: Monday and Wednesday, 4:00 pm - 5:20 pm
- Location: ERB 130 (in Engineering Research Building)

4 Description of Course Content from Course Catalog

Introduction to software project management. Issues include effort estimation and costing, project planning and scheduling, option analysis, software quality assurance, and formal technical reviews. Prerequisite: CSE 3310.

5 Student Learning Outcomes

Students will be able to manage, estimate, cost, plan, schedule, measure, and review software projects. In order to reach these outcomes, students will

- manage, estimate, cost, plan, schedule, specify, design, implement, test, and measure a software application
- present deliverables
- review deliverables of other teams

For each of the above tasks, students will use a language, tool, or technique that is being widely used in industry.
6 Required Textbooks and Other Course Materials

Required:

Recommended (but not required):

7 Descriptions of Major Assignments and Examinations

Following is the tentative outline. I will announce concrete dates in class.

- Homework: Throughout the course.
- Quizzes: Throughout the course.
- Project: Throughout the course.

8 Attendance

Students are expected to attend classes regularly.

9 Other Requirements

Student team meetings in addition to regular class meetings, as scheduled by the team members.

Prerequisites:

- CSE 3310.
- Undergraduate algorithms and data structures.
- Undergraduate discrete mathematics (set, relation, function, graph) and first-order logic.
- Undergraduate programming in Java or a similar language.
10 Grading

- 10% homework
- 20% quizzes
- 10% class participation such as asking and answering questions
- 30% project estimations, plans, schedules, measurements, specifications, designs, code, tests, reports, etc. (written)
- 10% project reviews (written)
- 20% project presentations (oral)

10.1 Grade Distribution

A from 85%, B from 70%, C from 60%, D from 50%, else F.

10.2 Deadline for Homework and Written Project Deliverables

Monday at 9am. The concrete dates will be announced in class.

10.3 Late Policy

Late submissions will be accepted until we discuss results. For being late up to one day the penalty is 10%, for up to two days it is 20%, etc.

10.4 Homework

Goal: Individually practice using a tool that will later be used in the project.

We will have two or three homework assignments. Each will focus on applying a software engineering tool discussed in class. I will provide instructions on how to use the tools.

10.5 Quizzes

Goal: Learn basic software project management techniques and principles that may be applied in the project.

Quizzes will be announced in class one week in advance. Each quiz will take place in the first 20 minutes of class. Quizzes are closed-book, but you can use a one-page cheat sheet that you have written yourself.

10.6 Project

Goal: Estimate, plan, schedule, measure, execute, explain, and critique software projects.

This is a team project. A team consists of three to five students. To make collaboration as easy as possible, I encourage you to use a free project hosting service such as Bitbucket or Google Code.

The project consists of, most likely, three iterations. After each iteration, each team will present some aspects of their project, both in writing and by oral presentation.

After each iteration, you will also formally review the deliverables of another team. Your reviews and feedback should be probing but always constructive and helpful.

You should distribute project work fairly among yourselves, but I leave the detailed project management to you. The oral presentations are an exception. Here I expect that each team member presents a similar amount of material.
For each project-related deliverable, written or oral, each team will receive a team score. The sum of these team scores will determine the majority of your project-related grade. In addition, for the entire project, each team member will receive an overall individual score. The individual score is derived from peer evaluations, your feedback to other teams during presentations, and your handling of questions.

For the deliverables, I will use the following general grading guidelines, which I copied from Professor Kung.

- 100–90: The proposed solution is adequate and valid and significantly exceeds expectations, the solution is well-organized and clearly described, assumptions are clearly stated.
- 89–80: The proposed solution is definitely adequate and valid, the solution is organized and described, assumptions are stated.
- 79–70: The proposed solution is somewhat adequate and valid, the solution is somewhat organized and partially described, some but not all assumptions are stated.
- 69–60: The proposed solution is only marginally adequate or valid, the solution is poorly organized or difficult to understand, important assumptions are not stated.
- 59–0: The proposed solution is incorrect or far from adequate and valid, the solution is impossible to comprehend.

10.7 Extra Credit: Tool Presentation

Goal: Teach your fellow students how to use a software project management tool. The tool should be useful for the project or a related software engineering problem.

Pick a software project management tool and explain how to use it step by step. To provide a better understanding of the tool, you should also explain the basic principles the tool is built on. You may add a comparison with related tools. Provide a hand-out that gives detailed instructions on how to use the tool. After your presentation, email me your hand-out (mandatory) and slides (optional). I will post them online. You may also maintain this material elsewhere and just email me a link to it.

Since most of the tools can be used in the project, the presentations are most useful at the beginning of the semester. To encourage early presentations, the maximum amount of extra credit will be 5% after Halloween but 10% before Halloween (October 31).

I will provide a list of suitable tools, but I welcome any suggestions you may have. Following is the web site for the tool presentations (which is shared with CSE 5324): https://wiki.uta.edu/display/serc/CSE-5324+Tools

10.8 Format

All written deliverables (homework, hand-outs, project reports, etc.) should be in plain text, HTML, or PDF, unless I announce otherwise.

11 Expectations for Out-of-Class Study

Beyond the time required to attend each class meeting, students enrolled in this course should expect to spend at least an additional 9 hours per week of their own time in course-related activities, including work on the class project, reading required materials, completing assignments, preparing for exams, etc.
12 Make-up Exams

The academic regulations of the university’s undergraduate catalog list the following two kinds of authorized absences.

- University authorized absences
- Observance of religious holy days

See the undergraduate catalog for details:

- http://wweb.uta.edu/catalog/content/general/academic_regulations.aspx#9
- http://wweb.uta.edu/catalog/content/general/academic_regulations.aspx#10

13 Grade Grievances

Any appeal of a grade in this course must follow the procedures and deadlines for grade-related grievances as published in the current undergraduate catalog. See:

http://wweb.uta.edu/catalog/content/general/academic_regulations.aspx#19

14 Drop Policy

Students may drop or swap (adding and dropping a class concurrently) classes through self-service in MyMav from the beginning of the registration period through the late registration period. After the late registration period, students must see their academic advisor to drop a class or withdraw. Undeclared students must see an advisor in the University Advising Center. Drops can continue through a point two-thirds of the way through the term or session. It is the student’s responsibility to officially withdraw if they do not plan to attend after registering. Students will not be automatically dropped for non-attendance. Repayment of certain types of financial aid administered through the University may be required as the result of dropping classes or withdrawing. For more information, contact the Office of Financial Aid and Scholarships (http://wweb.uta.edu/aao/fao/).

15 Americans With Disabilities Act

The University of Texas at Arlington is on record as being committed to both the spirit and letter of all federal equal opportunity legislation, including the Americans with Disabilities Act (ADA). All instructors at UT Arlington are required by law to provide “reasonable accommodations” to students with disabilities, so as not to discriminate on the basis of that disability. Any student requiring an accommodation for this course must provide the instructor with official documentation in the form of a letter certified by the staff in the Office for Students with Disabilities, University Hall 102. Only those students who have officially documented a need for an accommodation will have their request honored. Information regarding diagnostic criteria and policies for obtaining disability-based academic accommodations can be found at http://www.uta.edu/disability or by calling the Office for Students with Disabilities at (817) 272-3364.

16 Academic Integrity

Students enrolled in this course are expected to adhere to the UT Arlington Honor Code:
“I pledge, on my honor, to uphold UT Arlington’s tradition of academic integrity, a
tradition that values hard work and honest effort in the pursuit of academic excellence.
I promise that I will submit only work that I personally create or contribute to group
collaborations, and I will appropriately reference any work from other sources. I will
follow the highest standards of integrity and uphold the spirit of the Honor Code.”

UT Arlington faculty members may employ the Honor Code as they see fit in their courses,
including (but not limited to) having students acknowledge the honor code as part of an examination
or requiring students to incorporate the honor code into any work submitted. Per UT System
Regents’ Rule 50101, §2.2, suspected violations of university’s standards for academic integrity
(including the Honor Code) will be referred to the Office of Student Conduct. Violators will be
disciplined in accordance with University policy, which may result in the student’s suspension or
expulsion from the University.

17 Student Support Services

UT Arlington provides a variety of resources and programs designed to help students develop
academic skills, deal with personal situations, and better understand concepts and information
related to their courses. Resources include tutoring, major-based learning centers, developmental
education, advising and mentoring, personal counseling, and federally funded programs. For in-
dividualized referrals, students may visit the reception desk at University College (Ransom Hall),
call the Maverick Resource Hotline at 817-272-6107, send a message to resources@uta.edu, or view
the information at http://www.uta.edu/resources.

18 Electronic Communication

UT Arlington has adopted MavMail as its official means to communicate with students about
important deadlines and events, as well as to transact university-related business regarding financial aid, tuition, grades, graduation, etc. All students are assigned a MavMail account and are
responsible for checking the inbox regularly. There is no additional charge to students for using
this account, which remains active even after graduation. Information about activating and using MavMail is available at http://www.uta.edu/oit/cs/email/mavmail.php.

19 Mailing List

For this course we are using the mailing list CSE43225325-CSALLNER@listserv.uta.edu. I expect
you to subscribe to this mailing list and read the emails that are distributed over the mailing list. You can find the mailing list in the Public List Archives at http://listserv.uta.edu/. The mailing
list will be our main communication channel for homework assignments, clarification questions, etc.

20 Student Feedback Survey

At the end of each term, students enrolled in classes categorized as lecture, seminar, or laboratory
shall be directed to complete an online Student Feedback Survey (SFS). Instructions on how to
access the SFS for this course will be sent directly to each student through MavMail approximately
10 days before the end of the term. Each student’s feedback enters the SFS database anonymously.
and is aggregated with that of other students enrolled in the course. UT Arlington’s effort to solicit, gather, tabulate, and publish student feedback is required by state law; students are strongly urged to participate. For more information, visit http://www.uta.edu/sfs.

21 Final Review Week

A period of five class days prior to the first day of final examinations in the long sessions shall be designated as Final Review Week. The purpose of this week is to allow students sufficient time to prepare for final examinations. During this week, there shall be no scheduled activities such as required field trips or performances; and no instructor shall assign any themes, research problems or exercises of similar scope that have a completion date during or following this week unless specified in the class syllabus. During Final Review Week, an instructor shall not give any examinations constituting 10% or more of the final grade, except makeup tests and laboratory examinations. In addition, no instructor shall give any portion of the final examination during Final Review Week. During this week, classes are held as scheduled. In addition, instructors are not required to limit content to topics that have been previously covered; they may introduce new concepts as appropriate.

22 Emergency Exit Procedures

Should we experience an emergency event that requires us to vacate the building, students should exit the room and move toward the nearest exit, which is located towards the left as you exit the room. When exiting the building during an emergency, one should never take an elevator but should use the stairwells. Faculty members and instructional staff will assist students in selecting the safest route for evacuation and will make arrangements to assist handicapped individuals.

23 Course Schedule

1. Overview and Motivation
2. Project Plan
3. The Joel Test
4. Software Life Cycle
5. Configuration Management
6. Fagan Inspection and Reviews
7. People Management
8. Managing Software Quality
9. Cost Estimation
10. Project Planning and Control
11. Software Testing
12. Software Maintenance
13. Student team project presentations throughout the semester
14. Student team project final presentations in the last week of the semester

As the instructor for this course, I reserve the right to adjust this schedule in any way that serves the educational needs of the students enrolled in this course.

The latest version of this course schedule is available at: https://wiki.uta.edu/display/serc/CSE+4322+(Fall+2013)
24  About This Syllabus

This syllabus is based on the syllabus template provided by the provost (http://www.uta.edu/provost/.downloads/administrative-forms/syllabus-template.doc) and the “Tips for developing Student Learning Outcomes”, which is also provided by the provost (https://mavspace.uta.edu/departments/provost/public/outcomes-tips.pdf).
