**Instructor:** Dimitrios Zikos

**Office Number:** ERB 652

**Office Telephone Number:** 817-272-0161

**Email Address:** zikos@uta.edu

**Faculty Profile:** [https://www.uta.edu/profiles/dimitrios-zikos](https://www.uta.edu/profiles/dimitrios-zikos)

**Office Hours:** Monday-Wednesday 11.00am-12.00pm, Tuesday-Thursday 12.30pm-1.30pm

**Section Information:** 5339.001/4392.001

**Time and Place of Class Meetings:** Tuesday-Thursday 9:30AM - 10:50AM, SH 205

**Description of Course Content:** Data retrieval, maintenance and analysis are important, since providers and facilities need immediate access to patient and administrative information for decision making. Health informatics provides the appropriate technologies, tools and methods to efficiently support healthcare. This course introduces students to the principles of data collection in healthcare, discussing the sensitive and complex nature of health data. It covers aspects such as data redundancy issues and the problem of data overload in healthcare organizations. The course further explores data modeling, methods and tools for data analysis to facilitate decision making. It also introduces students to principles about healthcare professionals' training, to efficiently handle health data, and methods to evaluate data quality.

**Student Learning Outcomes:** By understanding the importance of data in healthcare students will appreciate methods to improve the quality of care and decision making, by efficiently collecting, safely using and assessing the quality of health data. Students will also learn how data modeling and data analysis are important, and how to deal with problematic data & data redundancies.

Lecture Notes and Questions for Critical Thinking will also be provided.

The course material will be uploaded on Blackboard

**Descriptions of major assignments and examinations:** The students will be graded based on their performance on set of four projects that they will be assigned. The projects will be based on the content of the course (databases and data mining in healthcare). There will be no final exam. During the semester the students will be tested in two small quizzes. The projects will include theoretical and practical aspects as well. Students are required to understand the fundamentals of database applications in healthcare, data mining concepts and health data analysis implications in order to fulfill the tasks successfully. At the end of the semester we will discuss the tasks in class, and the most common problems, as part of the learning process.

**Attendance:** As an instructor of this course, I have decided that attendance at class meetings is not required but strongly encouraged. It is important to stress that missing many lectures will make it difficult for students to understand important concepts of the course and the follow-up of new knowledge will become problematic.
Grading:
Projects will be assigned to students every three weeks Project 1-beginning of September, Project 2-beginning of October, Project 3-mid October, Project 4-beginning of November).

Here is the distribution of the grades:

Project 1: 15%
Project 2: 20%
Project 3: 20%
Project 4: 25%
Quiz 1: 10%
Quiz 2: 10%

The projects will be formed in a way that the student will already know the distribution of points for each one of the questions he/she has to answer.

Students are expected to keep track of their performance throughout the semester and seek guidance from available sources (including the instructor) if their performance drops below satisfactory levels.

Expectations for Out-of-Class Study: Beyond the time required to attend each class meeting, students enrolled in this course should expect to spend at least an additional five (5) hours per week of their own time in course-related activities, including reading required materials, completing assignments, preparing for exams, etc.

Drop Policy: Students may drop or swap (adding and dropping a class concurrently) classes through self-service in MyMav from the beginning of the registration period through the late registration period. After the late registration period, students must see their academic advisor to drop a class or withdraw. Undeclared students must see an advisor in the University Advising Center. Drops can continue through a point two-thirds of the way through the term or session. It is the student's responsibility to officially withdraw if they do not plan to attend after registering. Students will not be automatically dropped for non-attendance. Repayment of certain types of financial aid administered through the University may be required as the result of dropping classes or withdrawing. For more information, contact the Office of Financial Aid and Scholarships (http://wweb.uta.edu/aaofao/).

Americans with Disabilities Act: The University of Texas at Arlington is on record as being committed to both the spirit and letter of all federal equal opportunity legislation, including the Americans with Disabilities Act (ADA). All instructors at UT Arlington are required by law to provide "reasonable accommodations" to students with disabilities, so as not to discriminate on the basis of that disability. Any student requiring an accommodation for this course must provide the instructor with official documentation in the form of a letter certified by the staff in the Office for Students with Disabilities, University Hall 102. Only those students who have officially documented a need for an accommodation will have their request honored. Information regarding diagnostic criteria and policies for obtaining disability-based academic accommodations can be found at www.uta.edu/disability or by calling the Office for Students with Disabilities at (817) 272-3364.
Title IX: The University of Texas at Arlington is committed to upholding U.S. Federal Law “Title IX” such that no member of the UT Arlington community shall, on the basis of sex, be denied the benefits of, or be subjected to discrimination under any education program or activity. For more information, visit www.uta.edu/titleIX

Academic Integrity: Students enrolled in this course are expected to adhere to the UT Arlington Honor Code:

I pledge, on my honor, to uphold UT Arlington’s tradition of academic integrity, a tradition that values hard work and honest effort in the pursuit of academic excellence.
I promise that I will submit only work that I personally create or contribute to group collaborations, and I will appropriately reference any work from other sources. I will follow the highest standards of integrity and uphold the spirit of the Honor Code.

UT Arlington faculty members may employ the Honor Code as they see fit in their courses, including (but not limited to) having students acknowledge the honor code as part of an examination or requiring students to incorporate the honor code into any work submitted. Per UT System Regents’ Rule 50101, §2.2, suspected violations of university’s standards for academic integrity (including the Honor Code) will be referred to the Office of Student Conduct. Violators will be disciplined in accordance with University policy, which may result in the student’s suspension or expulsion from the University.

Student Support Services: UT Arlington provides a variety of resources and programs designed to help students develop academic skills, deal with personal situations, and better understand concepts and information related to their courses. Resources include tutoring, major-based learning centers, developmental education, advising and mentoring, personal counseling, and federally funded programs. For individualized referrals, students may visit the reception desk at University College (Ransom Hall), call the Maverick Resource Hotline at 817-272-6107, send a message to resources@uta.edu, or view the information at www.uta.edu/resources.

Electronic Communication: UT Arlington has adopted MavMail as its official means to communicate with students about important deadlines and events, as well as to transact university-related business regarding financial aid, tuition, grades, graduation, etc. All students are assigned a MavMail account and are responsible for checking the inbox regularly. There is no additional charge to students for using this account, which remains active even after graduation. Information about activating and using MavMail is available at http://www.uta.edu/oit/cs/email/mavmail.php.

Student Feedback Survey: At the end of each term, students enrolled in classes categorized as “lecture,” “seminar,” or “laboratory” shall be directed to complete an online Student Feedback Survey (SFS). Instructions on how to access the SFS for this course will be sent directly to each student through MavMail approximately 10 days before the end of the term. Each student’s feedback enters the SFS database anonymously and is aggregated with that of other students enrolled in the course. UT Arlington’s effort to solicit, gather, tabulate, and publish student feedback is required by state law; students are strongly urged to participate. For more information, visit http://www.uta.edu/sfs.

Final Review Week: A period of five class days prior to the first day of final examinations in the long sessions shall be designated as Final Review Week. The purpose of this week is to allow students sufficient time to prepare for final examinations. During this week, there shall be no scheduled activities such as required field trips or performances; and no instructor shall assign any themes, research problems or exercises of similar scope that have a completion date during or following this week unless specified in the class syllabus. During Final Review Week, an instructor shall not give any examinations constituting 10% or more of the final grade, except makeup tests and laboratory examinations. In addition, no instructor shall give any portion of the final examination during Final Review Week. During this week, classes are held as scheduled. In addition, instructors are not required to limit content to topics that have been previously covered; they may introduce new concepts as appropriate.
Emergency Exit Procedures: Should we experience an emergency event that requires us to vacate the building, students should exit the room and move toward the nearest exit of this building, as indicated by the instructor in the case of such an event. When exiting the building during an emergency, one should never take an elevator but should use the stairwells. Faculty members and instructional staff will assist students in selecting the safest route for evacuation and will make arrangements to assist handicapped individuals.

Writing Center: The Writing Center, 411 Central Library, offers individual 40 minute sessions to review assignments, Quick Hits (5-10 minute quick answers to questions), and workshops on grammar and specific writing projects. Visit https://uta.mywconline.com/ to register and make appointments. For hours, information about the writing workshops we offer, scheduling a classroom visit, and descriptions of the services we offer undergraduates, graduate students, and faculty members, please visit our website at www.uta.edu/owl/.

Course Schedule:

1. Nature of data in healthcare and data users
2. Data collection methods in healthcare
3. Smart Sensors for data collection & monitoring
4. Relational vs NoSQL databases in hospital information systems
5. Relational Model and Applications in Healthcare
6. Database & 2 views for different health pros
7. ERD of a healthcare process & transformation to relational model
8. Data Interoperability -The Health Level 7 (HL7)
9. Creating a simple HL7 message
10. Big Data Issues in Healthcare
11. Data Mining in Healthcare (1)
12. Data Mining in Healthcare (2)
13. Weka: data mining using simulated dataset (1)
14. Weka: data mining using simulated dataset (2)
15. Decision Making in Healthcare
16. Sensitive Data-Legal and Ethical Issues
17. Quality Data Critical to Health Decision Making
18. Healthcare Data Quality and Indicators
19. Overview and Revision of Key Concepts

Lecture meetings for overview and exam preparation will also be scheduled.

As the instructor for this course, I reserve the right to adjust this schedule in any way that serves the educational needs of the students enrolled in this course.

–Dimitrios Zikos.

Emergency Phone Numbers: In case of an on-campus emergency, call the UT Arlington Police Department at 817-272-3003 (non-campus phone), 2-3003 (campus phone). You may also dial 911.
