

# ABSTRACT PRESENCE

June 17th - August 29th  
UC Art Gallery

---

**pre•sence:** the state or fact of existing or being present.

The term presence is often used to describe the physical, tangible existence of someone or something. For many viewers, it can also represent a feeling of the sight unseen, a sensation of the energy and atmosphere that a work of art maintains.

In this exhibition, Abstract Presence, these works have been gathered together from select student and faculty artists whose works support this concept of the visible and invisible presence of art through light, color, and symbolism.
