

The University of Texas at Arlington
Materials Science and Engineering Department

Professor Meletis

MSE 4390/5330

Fall 2016

Fundamentals of Corrosion Science & Engineering

Course Mechanics

Instructor: Efstathios “Stathis” I. Meletis, Professor
Office: 231 Engineering Laboratory Building
Telephone: (817) 272-2398 / email: meletis@uta.edu
Faculty Profile: <https://www.uta.edu/profiles/efstathios-meletis>
Office Hours: W, F: 1:30 – 2:30 pm or by appointment

Lecture Meetings: T, Th 3:30 – 4:50 pm, Room SH 129

Student Learning

Outcomes:

1. Students will learn the fundamental principles behind corrosion.
2. Students will be able to identify and understand the basic forms of aqueous and high temperature corrosion.
3. Students will be able to apply the corrosion principles in the materials selection process, protection from corrosion but also apply corrosion as a materials processing or “synthesis” technique.

Requirements: Introduction to materials science & engineering or equivalent course.

Project: A project is required dealing with selection of a specific research corrosion topic (MSE 5330) or problem in service (MSE 4390) involving a review with an extensive literature analysis and demonstrate mastery over the subject. The project involves a class presentation and a term paper.
Due Dates: Project topic selection (with instructor’s approval) before the Spring break; Class presentations: the last two weeks of classes; Term Paper: the last day of class.

Examinations: One mid-term (about in the middle of the semester) and a final examination.

Grading Basis:

Project (Presentation* 10%, Term paper+ 25%):	35%
Take Home Assignments:	15%
Midterm Exam:	25%
Final Exam:	25%

*The presentations will be in class during the last two weeks of the semester.
+The Term paper will be due at the last day of classes.

Grading Policy: ≥85%: A; 75-84: B; 60-74%: C; 50-59%: D; <50%: F

Attendance Policy: Students are allowed to miss up to 2 classes without a valid excuse.

Drop Policy: see UT Arlington drop policy.

Textbook: Denny A. Jones, *Principles and Prevention of CORROSION*, Prentice Hall, Second Edition, Upper Saddle River, NJ, 1996.

Disability Accommodations: UT Arlington is on record as being committed to both the spirit and letter of all federal equal opportunity legislation, including *The Americans with Disabilities Act (ADA)*, *The Americans with Disabilities Amendments Act (ADAAA)*, and *Section 504 of the Rehabilitation Act*. All instructors at UT Arlington are required by law to provide “reasonable accommodations” to students with disabilities, so as not to discriminate on the basis of disability. Students are responsible for providing the instructor with official notification in the form of a **letter certified** by the Office for Students with Disabilities (OSD). Only those students who have officially documented a need for an accommodation will have their request honored. Students experiencing a range of conditions (Physical, Learning, Chronic Health, Mental Health, and Sensory) that may cause diminished academic performance or other barriers to learning may seek services and/or accommodations by contacting:

The Office for Students with Disabilities, (OSD) www.uta.edu/disability or calling 817-272-3364. Information regarding diagnostic criteria and policies for obtaining disability-based academic accommodations can be found at www.uta.edu/disability.

Counseling and Psychological Services, (CAPS) www.uta.edu/caps/ or calling 817-272-3671 is also available to all students to help increase their understanding of personal issues, address mental and behavioral health problems and make positive changes in their lives.

Non-Discrimination Policy: *The University of Texas at Arlington does not discriminate on the basis of race, color, national origin, religion, age, gender, sexual orientation, disabilities, genetic information, and/or veteran status in its educational programs or activities it operates. For more information, visit uta.edu/eos.*

Title IX Policy: The University of Texas at Arlington (“University”) is committed to maintaining a learning and working environment that is free from discrimination based on sex in accordance with Title IX of the Higher Education Amendments of 1972 (Title IX), which prohibits discrimination on the basis of sex in educational programs or activities; Title VII of the Civil Rights Act of 1964 (Title VII), which prohibits sex discrimination in employment; and the Campus Sexual Violence Elimination Act (SaVE Act). Sexual misconduct is a form of sex discrimination and will not be tolerated. *For information regarding Title IX, visit www.uta.edu/titleIX or contact Ms. Jean Hood, Vice President and Title IX Coordinator at (817) 272-7091 or jmhood@uta.edu.*

Academic Integrity: Students enrolled all UT Arlington courses are expected to adhere to the UT Arlington Honor Code:

I pledge, on my honor, to uphold UT Arlington's tradition of academic integrity, a tradition that values hard work and honest effort in the pursuit of academic excellence.

I promise that I will submit only work that I personally create or contribute to group collaborations, and I will appropriately reference any work from other sources. I will follow the highest standards of integrity and uphold the spirit of the Honor Code.

Electronic Communication: UT Arlington has adopted MavMail as its official means to communicate with students about important deadlines and events, as well as to transact university-related business regarding financial aid, tuition, grades, graduation, etc. All students are assigned a

MavMail account and are responsible for checking the inbox regularly. There is no additional charge to students for using this account, which remains active even after graduation. Information about activating and using MavMail is available at <http://www.uta.edu/oit/cs/email/mavmail.php>.

Campus Carry: Effective August 1, 2016, the Campus Carry law (Senate Bill 11) allows those licensed individuals to carry a concealed handgun in buildings on public university campuses, except in locations the University establishes as prohibited. Under the new law, openly carrying handguns is not allowed on college campuses. For more information, visit <http://www.uta.edu/news/info/campus-carry/>

Student Feedback Survey: At the end of each term, students enrolled in face-to-face and online classes categorized as “lecture,” “seminar,” or “laboratory” are directed to complete an online Student Feedback Survey (SFS). Instructions on how to access the SFS for this course will be sent directly to each student through MavMail approximately 10 days before the end of the term. Each student’s feedback via the SFS database is aggregated with that of other students enrolled in the course. Students’ anonymity will be protected to the extent that the law allows. UT Arlington’s effort to solicit, gather, tabulate, and publish student feedback is required by state law and aggregate results are posted online. Data from SFS is also used for faculty and program evaluations. For more information, visit <http://www.uta.edu/sfs>.

Emergency Exit Procedures: Should we experience an emergency event that requires us to vacate the building, students should exit the room and move toward the nearest exit, located on the right hand side of the class room door. When exiting the building during an emergency, one should never take an elevator but should use the stairwells. Faculty members and instructional staff will assist students in selecting the safest route for evacuation and will make arrangements to assist individuals with disabilities.

Student Support Services: UT Arlington provides a variety of resources and programs designed to help students develop academic skills, deal with personal situations, and better understand concepts and information related to their courses. Resources include [tutoring](#), [major-based learning centers](#), developmental education, [advising and mentoring](#), personal counseling, and [federally funded programs](#). For individualized referrals, students may visit the reception desk at University College (Ransom Hall), call the Maverick Resource Hotline at 817-272-6107, send a message to resources@uta.edu, or view the information at <http://www.uta.edu/universitycollege/resources/index.php>.

Materials Science and Engineering Department

Professor Meletis

MSE 4390/5330

Fall 2016

Fundamentals of Corrosion Science & Engineering

Course Content

- I. Materials science principles and Introduction to corrosion - 1 lecture.
- II. Corrosion Principles: Electrochemical Aspects, Environmental Effects - 1 lecture.
- III. Modern Theory of Aqueous Corrosion: Thermodynamic Aspects, Pourbaix Diagrams, Electrode Potential, Electrode Kinetics, Passivity, Applications - 7 lectures.
- IV. High Temperature Corrosion: Oxidation, High-Temperature Reactions, Mechanisms and Kinetics, High-Temperature Materials and Coatings - 4 lectures.
- V. Forms of Corrosion: Galvanic, Concentration Cells, Pitting, Crevice, Intergranular, Erosion, Wear-Corrosion, Environmentally-Induced Cracking: Stress Corrosion Cracking, Hydrogen Embrittlement, Corrosion Fatigue - 3 lectures.
- VI. Corrosion Protection and Prevention: Design and Materials Selection, Inhibitors, Cathodic and Anodic Protection, Coatings, Novel Surface Modification Techniques (Ion Plating, Surface Treatments, Laser Treatments and Alloying) – 2 lectures.
- VII. Corrosion Testing and Evaluation: Field Tests, Laboratory Tests, Polarization Methods to Measure Corrosion Rate and Characterize Corrosion Behavior – 2 lectures.
- VIII. Case Histories and Corrosion Failure Analysis- 2 lectures.
