PSYC 5324.001: Applied Research Design Fall 2017

Instructor: Dr. Lauren Coursey

Office Number: LS 302

Lab: LS 527

Email Address: lcoursey@uta.edu

Faculty Profile: https://www.uta.edu/profiles/lauren-coursey

Office Hours: M 12:00 – 2:00 & W 10:00 – 11:00, or by appointment

Section Information: PSYC 5324.001 (3 hours of credit) **Time and Place of Class Meetings:** T/TH 3:30 – 4:50; LS 428

Description of Course Content and Learning Outcomes: The course offers an advanced survey of psychological methodology. The course will cover various methodologies including experimental, quasi-experimental, and field designs, among others. The course will address important design issues such as validity, generalizability, and ethics. Upon completion of the course, students should develop a general understanding of the strengths and weaknesses of various designs, the knowledge necessary to evaluate research programs, and an appreciation for the intricacies involved in complex, dynamic research settings.

Required Textbook:

Shadish, W. R., Campbell, D. T. & Cook, T. D. (2002). *Experimental and Quasi-Experimental Designs for Generalized Causal Inference*. Boston, MA: Houghton Mifflin Company.

Hoyle, R. H., Harris, M. J. & Judd, C. H. *Research Methods in Social Relations*. Holt, Rinehart and Winston, 2002. *Seventh Edition*.

Blackboard: The use of Blackboard is required in this course. Make it a habit to check Blackboard regularly. We will use this space to post grades, announcements, additional readings, updates to the syllabus, and any other relevant content. Course grades will be posted on Blackboard <u>only</u>. You must have a valid UTA user ID to access Blackboard. Blackboard website: https://elearn.uta.edu/webapps/login/

Research Proposal (100 points): Submit one research proposal for a novel project that involves a field or quasi-experimental design. Your paper should include a comprehensive literature review and a discussion of the novelty/importance of your proposed research. Thoroughly discuss your methodological design and data analysis plan including the setting, population, and data collection technique. Your discussion should focus on the potential validity and ethical issues (and ways future research could address these) you may face when conducting the proposed research. If relevant, discuss the ways in which your research will impact real-world I/O practices. Your paper should be 10-15 pages in length. You must also include all necessary materials to submit an IRB protocol (i.e., Form 1, informed consent document, debriefing statement, copy of questionnaire as it appears to participants, etc.). Each section of the proposal will have a separate due date (i.e., you will turn in the paper in separate sections). Rubric posted separately. Papers should be submitted as word documents to blackboard. All papers will be analyzed using SafeAssign. Plagiarism (> 40% match) will not be tolerated under any circumstances and will result in a zero for the assignment.

Proposal Presentation (20 points): At the end of the semester, each student will present her/his research proposal to the class. In your presentation please discuss why you have chosen the particular research question. Discuss why your research is needed/important → Does your research address important gaps in the literature? Does your research have practical value? Summarize your methodological and data analysis plan. Thoroughly discuss the limitations of your plan. Your presentation should be approx. 10-15 minutes and include a powerpoint (or similar) presentation. Your slides should be submitted to blackboard after your presentation. Be prepared to answer questions regarding your research proposal.

Real-Data Project (40 points): You and your group will explore an actual dataset, perform analyses, and present your findings to the class. I will provide datasets for you to choose from. You will perform analyses,

write up your results, and present results in a nontechnical — broad audience — format. Be prepared to present your results to a broad/general audience (audience with little/no expertise in statistics/methodology). Your presentation should be approx. 10-15 minutes and include a powerpoint (or similar) presentation. Your slides should be submitted to blackboard after your presentation. The write-up of your analyses and results (approximately 3 pages, APA format) should be posted to blackboard (along with the final version of your dataset and spss syntax) after your presentation. Rubric posted separately. Further details will be provided in class. Papers should be submitted as word documents to blackboard. All papers will be analyzed using SafeAssign. Plagiarism (> 40% match) will not be tolerated under any circumstances and will result in a zero for the assignment.

Group Discussion (40 points): You (and your group if you choose) will choose either a controversial issue or advanced design method to present to the class. You will present the main points of the issue (or method). Your job is to initiate and moderate a short class discussion pertaining to the different sides of the issue OR pros/cons of the research design. You should also discuss the ways in which the issue/method relates to broad topics discussed in lecture/main texts. Your classmates are expected to respond/participate in the discussion! Rubric posted separately. Your presentation should be approx. 15-20 minutes and include a powerpoint (or similar) presentation. Your slides should be submitted to blackboard after your presentation.

General Participation (20 points): You will earn a running average of participation points for the course (where 1 = never speaking; giving short or poor responses when called on; 10 = speaks an average amount; 20 = regular participant in discussion; shows evidence of having read materials & can correctly answer questions). This score will be updated regularly on Blackboard. Points will be lost for absence, lateness, disruptions, cell phone usage, etc. You should come prepared to every class. You will be expected to contribute to class discussions and will be called upon to answer questions regarding any required readings. You are expected to participate in your classmates' group discussions!

Quizzes (**80 points**): There will be 8 quizzes (approximately one per week) throughout the semester. Each quiz is worth 10 points. All quizzes will be administered in class and will consist short answer questions based on the assigned readings.

Attendance: As graduate students you are expected to attend every class. Students who miss a class for any reason or miss a portion of a class due to tardiness or early departure will still be held accountable for all of the material that is covered during those sessions, including material covered in lecture that is not in the book/readings.

Grading:

Research Proposal	100pts
Proposal Presentation	20pts
Real Data Project	40pts
Group Discussion	40pts
Participation	20pts
Quizzes	80pts
Total	300pts

If you are having difficulty with the class material, or believe you are doing poorly, please talk to me about your situation earlier rather than later. Do not wait until after the final to discuss your GPA, exam grades, or if you have a dispute with a grade you were given. It is your responsibility to verify with me that the percentages that you think you've earned are accurate. If you are near the border of a grade boundary (e.g., **between** a B and an A), this is especially important. Students are expected to keep track of their performance throughout the semester and seek guidance from available sources (including the instructor) if their performance drops below satisfactory levels; see "Student Support Services," below.

Expectations for Out-of-Class Study: A general rule of thumb is this: for every credit hour earned, a student should spend 3 hours per week working outside of class. Hence, a 3-credit course might have a minimum expectation of 9 hours of reading, study, etc.

Drop Policy: Students may drop or swap (adding and dropping a class concurrently) classes through self-service in MyMav from the beginning of the registration period through the late registration period. After the late registration period, students must see their academic advisor to drop a class or withdraw. Undeclared students must see an advisor in the University Advising Center. Drops can continue through a point two-thirds of the way through the term or session. It is the student's responsibility to officially withdraw if they do not plan to attend after registering. **Students will not be automatically dropped for non-attendance**. Repayment of certain types of financial aid administered through the University may be required as the result of dropping classes or withdrawing. For more information, contact the Office of Financial Aid and Scholarships (http://wwweb.uta.edu/aao/fao/).

Disability Accommodations: UT Arlington is on record as being committed to both the spirit and letter of all federal equal opportunity legislation, including *The Americans with Disabilities Act (ADA)*, *The Americans with Disabilities Amendments Act (ADAAA)*, and *Section 504 of the Rehabilitation Act*. All instructors at UT Arlington are required by law to provide "reasonable accommodations" to students with disabilities, so as not to discriminate on the basis of disability. Students are responsible for providing the instructor with official notification in the form of a letter certified by the **Office for Students with Disabilities (OSD)**. Students experiencing a range of conditions (Physical, Learning, Chronic Health, Mental Health, and Sensory) that may cause diminished academic performance or other barriers to learning may seek services and/or accommodations by contacting:

The Office for Students with Disabilities, (OSD) www.uta.edu/disability or calling 817-272-3364. Counseling and Psychological Services, (CAPS) www.uta.edu/caps/ or calling 817-272-3671.

Only those students who have officially documented a need for an accommodation will have their request honored. Information regarding diagnostic criteria and policies for obtaining disability-based academic accommodations can be found at www.uta.edu/disability or by calling the Office for Students with Disabilities at (817) 272-3364.

Title IX: The University of Texas at Arlington does not discriminate on the basis of race, color, national origin, religion, age, gender, sexual orientation, disabilities, genetic information, and/or veteran status in its educational programs or activities it operates. For more information, visit <u>uta.edu/eos</u>. For information regarding Title IX, visit www.uta.edu/titleIX.

Non-Discrimination Policy: The University of Texas at Arlington does not discriminate on the basis of race, color, national origin, religion, age, gender, sexual orientation, disabilities, genetic information, and/or veteran status in its educational programs or activities it operates. For more information, visit uta.edu/eos.

Academic Integrity: Students enrolled all UT Arlington courses are expected to adhere to the UT Arlington Honor Code:

I pledge, on my honor, to uphold UT Arlington's tradition of academic integrity, a tradition that values hard work and honest effort in the pursuit of academic excellence.

I promise that I will submit only work that I personally create or contribute to group collaborations, and I will appropriately reference any work from other sources. I will follow the highest standards of integrity and uphold the spirit of the Honor Code.

UT Arlington faculty members may employ the Honor Code as they see fit in their courses, including (but not limited to) having students acknowledge the honor code as part of an examination or requiring students to incorporate the honor code into any work submitted. Per UT System *Regents' Rule* 50101, §2.2, suspected violations of university's standards for academic integrity (including the Honor Code) will be referred to the

Office of Student Conduct. Violators will be disciplined in accordance with University policy, which may result in the student's suspension or expulsion from the University.

Electronic Communication: UT Arlington has adopted MavMail as its official means to communicate with students about important deadlines and events, as well as to transact university-related business regarding financial aid, tuition, grades, graduation, etc. All students are assigned a MavMail account and are responsible for checking the inbox regularly. There is no additional charge to students for using this account, which remains active even after graduation. Information about activating and using MavMail is available at http://www.uta.edu/oit/cs/email/mavmail.php.

I will only communicate with you via e-mail using your UT-Arlington e-mail account. Messages relevant to the class will be posted on Blackboard. I strongly encourage you to get the e-mail and telephone number of at least one other person in class. **Do not e-mail asking to be bumped up to the next letter grade.**

Student Feedback Survey: At the end of each term, students enrolled in classes categorized as "lecture," "seminar," or "laboratory" shall be directed to complete an online Student Feedback Survey (SFS). Instructions on how to access the SFS for this course will be sent directly to each student through MavMail approximately 10 days before the end of the term. Each student's feedback enters the SFS database anonymously and is aggregated with that of other students enrolled in the course. UT Arlington's effort to solicit, gather, tabulate, and publish student feedback is required by state law; students are strongly urged to participate. For more information, visit http://www.uta.edu/sfs.

Final Review Week: A period of five class days prior to the first day of final examinations in the long sessions shall be designated as Final Review Week. The purpose of this week is to allow students sufficient time to prepare for final examinations. During this week, there shall be no scheduled activities such as required field trips or performances; and no instructor shall assign any themes, research problems or exercises of similar scope that have a completion date during or following this week *unless specified in the class syllabus*. During Final Review Week, an instructor shall not give any examinations constituting 10% or more of the final grade, except makeup tests and laboratory examinations. In addition, no instructor shall give any portion of the final examination during Final Review Week. During this week, classes are held as scheduled. In addition, instructors are not required to limit content to topics that have been previously covered; they may introduce new concepts as appropriate.

Campus Carry: Effective August 1, 2016, the Campus Carry law (Senate Bill 11) allows those licensed individuals to carry a concealed handgun in buildings on public university campuses, except in locations the University establishes as prohibited. Under the new law, openly carrying handguns is not allowed on college campuses. For more information, visit http://www.uta.edu/news/info/campus-carry/

Emergency Exit Procedures: Should we experience an emergency event that requires us to vacate the building, students should exit the room and move toward the nearest exit, located to your right. When exiting the building during an emergency, one should never take an elevator but should use the stairwells. Faculty members and instructional staff will assist students in selecting the safest route for evacuation and will make arrangements to assist individuals with disabilities.

Student Support Services: UT Arlington provides a variety of resources and programs designed to help students develop academic skills, deal with personal situations, and better understand concepts and information related to their courses. Resources include tutoring, major-based learning centers, developmental education, advising and mentoring, personal counseling, and federally funded programs. For individualized referrals, students may visit the reception desk at University College (Ransom Hall), call the Maverick Resource Hotline at 817-272-6107, send a message to resources@uta.edu, or view the information at http://www.uta.edu/universitycollege/resources/index.php

Librarian to Contact: The psychology subject librarian is: Peace Ossom Williamson (<u>peace@uta.edu</u>), 817-272-6208, 313 Central Library. Visit <u>library.uta.edu</u> for more details and resources.
